

IPU originated PVC healthcare equipment 40 years ago in 1984, and we continue to lead the industry, manufacturing more than two thirds of all PVC equipment in facilities throughout the US and more than 90% in European markets.

We only use top quality materials: A proprietary blend of furniture grade PVC, including strong and durable, custom-made fittings specifically designed for healthcare and swim pool equipment.

Our swimming and teaching platforms enable your swimmers to build confidence in the water during swimming lessons, therapy, and aquatic exercises. IPU swim platforms will help provide students with a greater sense of security and help eliminate the fear of swimming.

The multi-purpose design can be used for many different applications, it is a versatile pool accessory for a variety of activities. It can also be flipped over to accommodate training in different depths of water.

Our cost-efficient pool islands are incredibly strong, lightweight, and easy on the budget. They are designed to vastly outperform similar items in the market.

All of our products are fully-customizable. If you don't see something that will work perfectly for your needs, let us know and we will work with you to find the best possible solution.
